DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Stenberg.

3. With respect to claim 1, Stenberg shows (see Figure 3) first and second drain contacts 3, 4, a gate 7 which controls the current flow from source to drain, first and second supplemental gates 5, 6 where the three gates are insulated from each other by insulators 8, 9. While not shown by Stenberg, the FET inherently has a doped channel layer and doped source and drain. A potential applied between the gates 5, 6 will exert a lateral electric field in the channel.

4. Claims 1 and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Kub.

5. With respect to claim 1, Kub shows (see cover Figure and Figure 1) a doped layer 22, doped source and drain 12, 14, first and second drain contacts 14a, 14b, a gate 26 which controls the current flow from source to drain, first and second supplemental gates 30a, 30b where the three gates are insulated from each other by lack of contact. A potential applied between the gates 30a, 30b will exert a lateral electric field in the channel.

Allowable Subject Matter

6. Claims 2 – 4 and 10 – 13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 2814

7. Neither Stenberg nor Kub show the connection between the supplemental gates and the drains.

8. Claims 5 – 8 are allowed.

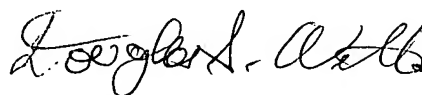

9. Neither Stenberg nor Kub show the application of a voltage parallel to the Lorentz force.
